

Process Vision Welcomes Spencer Parker

Basingstoke, UK - Process Vision, is pleased to announce the appointment of Spencer Parker as General Manager, North America.

Parker, has an impressive track record in launching new technologies and a wealth of experience in various roles across the industry, he brings a fresh perspective and valuable expertise to the team.

Parker has established himself as a dynamic leader with a passion for driving innovation and improving industrial processes through advanced measurement, controls, and data solutions. His extensive background as a salesperson, manager, distributor, independent representative, and operations director on five continents has equipped him with a deep understanding of the global oil and gas landscape.

Having successfully introduced cutting-edge analyzer technologies to the market worldwide, Parker's addition to the Process Vision team reinforces the company's commitment to delivering groundbreaking solutions and exceeding customer expectations. His experience and expertise will play a pivotal role in driving the company's growth and expansion in North America.

"We are thrilled to welcome Spencer as our new General Manager for North America," said Paul Stockwell, Managing Director at Process Vision. "Spencer's proven track record in launching new technologies, coupled with his extensive experience in the oil and gas industry, will be invaluable as we continue to innovate and provide exceptional solutions to our customers. We are confident that under his leadership, Process Vision will further strengthen its position as a leading provider in the market."

Parker holds a Bachelor's degree in Mechanical Engineering from Virginia Tech and an Executive MBA from the University of Georgia. His strong educational background combined with his hands-on industry experience positions him as a strategic and results-driven leader capable of spearheading Process Vision's operations in the North America.

About Process Vision:

Process Vision, based in Basingstoke, UK, is innovating for a better tomorrow. We are revolutionising the industry with cutting-edge technology, enhancing lives and businesses. We optimise processes, predict failures, and set a new standard for efficiency.

Process Vision partners with engineers and managers in the energy industry to improve reliability and efficiency through innovative image-processing technology. Our systems detect and alert on hydrate, wax, and contamination in pipelines while providing expert guidance for effective removal. With real-time visibility into pipeline health, accurate video evidence, time and location stamped, and unique optical detection technology, Process Vision delivers peace of mind and reduces the risk of equipment failure or shutdowns.
