## Process Vision to Showcase LineVu at the Rocky Mountain Measurement Society Trade Show

Basingstoke, UK - Process Vision, a leader in innovative monitoring solutions, is excited to announce its participation in the upcoming Rocky Mountain Measurement Society (RMMS) Trade Show on Thursday, August 24th, 2023. The event will be held at the Embassy Suites by Hilton, located at 4705 Clydesdale Pkwy, Loveland, CO 80538.

The RMMS Trade Show is a one-day event aimed at bringing together industry professionals, users, and suppliers to discuss the latest advancements in measurement technologies and solutions. This event serves as a platform to foster collaboration, address challenges in measurement, and explore cutting-edge technologies.

At the trade show, Process Vision will be showcasing its groundbreaking LineVu system, a comprehensive solution designed to provide unparalleled insights into pipeline operations. LineVu's live video streaming camera offers real-time visibility into gas flow at pressure, enabling users to make informed decisions for process control. The system empowers engineers and operators by revolutionizing the way they monitor, optimize, and secure their operations.

"We are thrilled to participate in the RMMS Trade Show and introduce attendees to the transformative capabilities of LineVu," said Spencer Parker, General Manager, North America at Process Vision. "Our system's ability to provide live streaming and high-resolution video enables proactive monitoring of glycol and NGL carryover, leading to increased revenue for processing plants and reduced maintenance costs for transmission system operators."

For attendees, the RMMS Trade Show offers a unique opportunity to explore multiple vendors and gain insights into the latest technologies developed by leading companies in the industry. The event will include an exhibit area and classroom presentations where users and vendors can engage in discussions about measurement challenges and potential solutions.

"As a vendor, this trade show is an exceptional chance for us to showcase LineVu to a focused group of measurement professionals," added Parker. "We look forward to engaging with attendees and demonstrating how LineVu can contribute to enhanced operational efficiency and profitability."

Process Vision encourages all attendees to visit their exhibit at the RMMS Trade Show to learn more about LineVu's capabilities and benefits. Don't miss this opportunity to discover how LineVu can revolutionize the way you approach pipeline monitoring and control.

### About Process Vision:

Process Vision, based in Basingstoke, UK, is innovating for a better tomorrow. We are revolutionising the industry with cutting-edge technology, enhancing lives and businesses. We optimise processes, predict failures, and set a new standard for efficiency.

Process Vision partners with engineers and managers in the energy industry to improve reliability and efficiency through innovative image-processing technology. Our systems detect and alert on hydrate, wax, and contamination in pipelines while providing expert guidance for effective removal. With real-time visibility into pipeline health, accurate video evidence, time and location stamped, and unique optical detection technology, Process Vision delivers peace of mind and reduces the risk of equipment failure or shutdowns.
